

THE PROJECT IS COMING TO AN END

In May 2024 the Digital Generations project will come to an end after two and a half years of activities in five European countries: Slovenia, Greece, Spain, Bulgaria and France.

Two European trainings for young people, two guides to work with seniors on activities related to new technologies,

two pilot testing in all partner countries in which we have been able to promote intergenerationality and train our seniors in the use of new technologies, several transnational meetings of the partners and many more online... What good memories!

Although the project is about to end, all the materials and results are still available for you, so don't miss the last activities that have been done!

RESULTS

STATE OF THE ART RESEARCH

The aim of this result is to analyze the skills that are needed by the target group (people that have retired and are over 62) and to create a framework of evaluation of the seniors' digital skills and what best practices to close that digital gap are already in place.

DIGITAL TOOLS HANDBOOK

This handbook provides tools for the elderly people to develop digital skills to be creative online in cooperation with a young adult (18-30 years old) who has the digital skills and actively creates digital content.

GUIDEBOOK WITH THE TRAINING METHODOLOGY

This Training Methodology can be followed by young people to teach seniors how to use those tools. It proposes learning pathways depending on their initial skill level and also depending on the creative activity they want to implement.

GUIDEBOOK WITH THE MENTORING METHODOLOGY

The Mentoring Methodology shows how to accompany seniors to create artistic digital products and share them online. It aims at making the process of creating the artistic/creative piece a learning itinerary in which seniors take in the knowledge and interiorize it.

GUIDELINE FOR OTHER MUNICIPALITIES AND INTERESTED ORGANIZATIONS ACROSS EUROPE

This result aims to help other municipalities and organizations across Europe to implement programmes to encourage intergenerational training on IT for seniors.

PILOT TESTING OF THE MENTORING METHODOLOGY

FRANCE

In France, in November 2023 E-Seniors held two training sessions involving two seniors and two young mentors, who taught the seniors how to use Canva and share their creative works.

SLOVENIA

In Slovenia, DCHS held three training sessions with 28 seniors, while Municipality of Kamnik held the training sessions in January 2024 with the participation of two seniors and two young mentors.

SPAIN

In Spain, in November 2023 Defoin carried out the II Course on New Technologies, a 6-hour training course which was attended by 6 seniors from El Escorial, Madrid.

GREECE

In Greece, in January 2024 4-Elements organised four training sessions of 12 hours in total where 7 seniors were encouraged to be creative online.

BULGARIA

In Bulgaria, two senior and two young mentors participated in two training sessions organised by RCNE to boost online creativity.

LAST PROJECT MEETING AND MULTIPLIER EVENTS

On the 18th April 2024 the partners will meet again, this time online, for the last meeting of the project. In this occasion partners will discuss about the last steps needed to finalise the project, the evaluation of the project and new ideas to keep the Digital Generations project alive after its end.

Finally, to celebrate the end of the project, all partners will held different events in their respective countries to inform all interested people about the activities carried out and, above all, to share our most important learning throughout this project. If you are interested in these events, contact us!

INTERGENERATIONALITY IS THE KEY TO THE TECHNOLOGICAL EDUCATION OF OUR SENIORS!
